

EMBRACE

ADVANCE extendable

Order Code: F 9LP0035

The Embrace Advance paediatric bed has clean, modern lines and adheres to the highest standards of safety and infection control. Designed for patients of a variety of ages. **Electrically operated backrest movements, Trendelenburg, reverse Trendelenburg positions** and platform height adjustments. The key feature of this bed is the extendable mattress platform.

Telescopic siderails that extend automatically with the platform. **Reduced gaps between the bars for added security.**

Electrically operated bed extender providing an increase in length of 28cm. **During extension, the platform remains completely flat.**

Control panel with lockable commands. The control panel is conveniently located for the operator but out of reach for the child.

Mattress platform height may be adjusted electrically so as to be at the most suitable height for both the child and the operator.

Washable 150mm wheels with centralised braking system.

Complete with Australian made mattress and Carflex waterproof, breathable zippable cover with waterfall edge. Cover can be machine washed to 95 deg C and room air dried.

Mattress extender available as well as side covers to infill the gaps when the bed is extended.

Standard removable headboard. Removable footboard available.

Plastic support struts with simple, clean lines for easy cleaning and disinfection.

Back and pelvis sections with removable ABS cover, leg section made from HPL panels. All surfaces are easy to clean and disinfect. **The platform is perforated to allow effective aeration of the mattress.**

Epoxy coated steel side rails with dampened lowering motion.

Standard features (other features may be customised).

STANDARD FEATURES

The Embrace Advance bed **extends electrically** to adapt to children of all sizes. The siderails are telescopic and lengthen automatically with the platform for maximum side protection and increased patient safety.

Siderail height platform: 60cm

The platform height variation is adjustable by means of electrically operated **telescopic columns**. The platform can be raised from a minimum of 58cm to a maximum of 98cm - **a range of 40cm**.

Electrically operated backrest **adjustable from 0° to 75°**. Safety cover under the backrest to protect the child from potential harm or from falls. **Manually operated leg section adjustable to a range of positions**. All surfaces are extremely quick and easy to clean and disinfect.

The **Trendelenburg** and **reverse Trendelenburg** movements provide flexibility in positioning and patient care.

STANDARD FEATURES

The head/foot panels are removed via a **lock/release system** which is easy to use and placed well out of the child's reach.

The **CPR lever** is located at the head end. The lever enables rapid manual lowering of the back section and can be reached easily by the operator from either side of the bed.

Siderail adjustments are **gas spring assisted** to provide optimum stability and safety. The siderail release mechanism is located under the platform, out of the child's reach. The gaps between the siderails and head/foot panels have been reduced for **added safety**.

The control panel is **conveniently located for the operator**, but well out of reach for the child.

Flip up HLP leg section for easy cleaning. All the sections of the platform can be cleaned and disinfected quickly and effectively.

CUSTOMISABLE FEATURES

150mm antistatic, **washable twin wheels**, with centralised braking system.

125mm antistatic, **washable wheels**, with centralised braking system.

Removable head panel; fixed foot panel.

Removable head and foot panels.
